EXPERIENCE

Night Auditor
IBIS London Heathrow November 2023 - Present, London, United Kingdom

· My experience as a Night Auditor equipped me with a unique set of skills and experiences that greatly enhance my transition into a web development career.

· Throughout my tenure at Ibis, I performed several daily tasks like Balancing Financial Transaction, Posting Room Charges, Generating Reports, Managing Reservations, Guest Inquiries and Requests, Problem Resolution and Administrative Tasks.

· My time at Ibis also sharpened my skills in Attention to Detail, Problem-Solving, Time Management, Customer Service, and Communication.

Front End Web Developer Intern
Disha March 2022 - July 2023, India

· During my 4-month internship as a Front-End Developer at Disha, I actively contributed to web development projects, collaborating with a dynamic team to craft seamless and visually engaging user interfaces.

· Implementing responsive web designs using HTML5, CSS3, and JavaScript while collaborating with cross-functional teams, including designers and back-end developers.

· Enhancing interactivity and user experience with React.js and Maintaining clean, efficient, and documented code.

· This internship not only honed my technical skills but also instilled a passion for creating user-centric web solutions that blend aesthetics with functionality.

· Selected as the Best Intern of the Year.

PROJECTS

Coding Blog
Royal Holloway · https://balharaankit.github.io/AnkitBootStrap/ · May 2023 - May 2023

· As a passionate web developer and coding enthusiast, I embarked on a personal project to create a coding blog using Bootstrap, a popular front-end framework, to showcase my skills and knowledge in web development.

· Technologies Used during this project development are: HTML/CSS, Bootstrap, JavaScript, Git and GitHub.

· This project not only served as a creative outlet for sharing my coding experiences but also allowed me to gain hands-on experience in web development and design.

Currency Convertor
Royal Holloway · March 2023 - April 2023

· The Currency Converter project serves as a web-based application engineered to assist users in swiftly and effortlessly converting between various currencies. It leverages front-end technologies to construct a user-friendly and responsive interface, facilitating seamless currency conversion and offering a range of features.

· This project boasts several extraordinary features that provide an authentic experience, such as its User-Friendly Interface, Currency Selection, Real-Time Exchange Rates, and Conversion Calculation.

· Technologies employed in this project encompass HTML, CSS, JavaScript, API Integration, and Responsive Web Design.

Amazon Clone
Royal Holloway · February 2023 - February 2023

· On my resume, I aim to showcase a project in which I developed a clone of the popular e-commerce website, Amazon, using HTML and CSS. This project highlights my proficiency in front-end web development and my capability to replicate complex and well-known websites.

· The primary objective of this project involved crafting a visually appealing and fully functional replica of the Amazon website.

· This encompassed duplicating the website's layout, design elements, and user interface to deliver an authentic and immersive user experience.
